INTERNATIONAL CONFERENCE ON SUSTAINABLE MANAGEMENT OF FALL ARMYWORM (INCOFAW-2025) (Global Collaboration for Sustainable Crop Protection)

ABOUT THE CONFERENCE

Fall armyworm (FAW), *Spodoptera frugiperda* (J. E. Smith) has become a global pest causing serious damage on maize and other crops. It is native to Americas, invaded African continent in 2016. In India it was first reported in 2018 on maize in Shivamogga and Davanagere districts of Karnataka. Later, it spread rapidly across several countries in Asia and Oceania, causing great economic losses in maize and other crops. Maize is the third most important cereal crop in India, following rice and wheat. The area under maize in India is 11.24 million ha with a production of 37.67 million tonnes. Among the maize growing states of India, Karnataka stands first with an area of 1.91 million ha and production of 17.80 million tonnes. Keladi Shivappa Nayaka University of Agricultural and Horticultural Sciences (KSNUAHS), Shivamogga worked on different aspects of fall armyworm since its invasion in 2018. The international conference on “Sustainable Management of Fall Armyworm” aims to provide a global platform for researchers to discuss challenges, share recent advancements and explore innovative ideas and strategies for the sustainable management of fall armyworm. The forum also aims to inspire young researchers to pursue innovative and sustainable solutions

ABOUT KSNUAHS, SHIVAMOGGA

Keladi Shivappa Nayaka University of Agricultural and Horticultural Sciences established in 2012 at Iruvakkki, Sagar taluk of Shivamogga district in Karnataka, is the first integrated University in the State of Karnataka, which has Agriculture, Horticulture and Forestry Sciences under its purview. It has an operational jurisdiction in seven districts. The University has comprehensive four-year degree program in Agriculture, Horticulture and Forestry with Post Graduate degrees in different disciplines. The KSNUAHS reported the invasion of fall armyworm on maize for first time in India and developed different management strategies to manage FAW. After its invasion, KSNUAHS in collaboration with line departments, private companies and NGOs organized state level conference and trainings for the benefit of maize farmers.

ABOUT THE DEPARTMENT

The Department of Entomology, established in 2002, has emerged as a centre of excellence in teaching, research and extension. Over the years, more than 100 M.Sc. and 20 Ph.D. scholars have successfully completed their degrees, contributing significantly to the understanding and management of insect pests across diverse crops. Notably, 15 postgraduate researchers have focused their work on various facets of FAW, leading to the development and dissemination of practical, farmer-friendly technologies that have benefited maize growers across the region. The department published more than 40 research papers on FAW in international and national journals. The video clip on FAW was also developed in local language to help the farming community.

THEMATIC AREAS

1. Climate change and ecology of fall armyworm
2. Host plant resistance in fall armyworm
3. Biological control of fall armyworm
4. Insecticide resistance in fall armyworm
5. Management of fall armyworm
6. Academia - Industry Interface

INVITED/ LEAD LECTURES

The organising committee will invite eminent experts/ scientists working on fall armyworm for delivering lead lectures. The invited lectures will be of 15 minutes followed by 5 minutes discussion.

CALL FOR ABSTRACTS

Abstract (a maximum of 250 words, excluding the title, name(s), and affiliation-typed in MS word format in single space font size 12 Times New Roman) must be submitted through the designated Google form/QR code/email : incofaw2025@uahs.edu.in. ABOUT SHIVAMOGGA AND ALSO TOURISM

Shivamogga is often referred to as the 'Gateway to Malnad', is renowned for its rich biodiversity and vibrant educational institutions. A major part of the district lies in the malnad region of Western Ghats, which is recognized as a global biodiversity hotspot with an abundance of unique flora and fauna. The world-famous Jog Falls, located 120 km from Shivamogga, is at its most spectacular during the monsoon season. The picturesque hill station Agumbe, known as the Cherrapunji of South India and famous for its breathtaking sunset views, is just 80 km away.

Nearby attractions also include the Sakrebailu Elephant Camp and the Tyavarekoppa Lion Safari, within 14 km from the university campus.

HOW TO REACH SHIVAMOGGA

Shivamogga is well connected by airport, road, and rail. From the venue Shivamogga airport 10 k.m. and other nearest airports are located at Hubballi (250 km), Bangalore (270 km) and Mangalore (225 km).

Message from the Vice-Chancellor

It gives me immense pleasure to welcome researchers, academicians, and industry professionals from across the globe to the *“International Conference on Sustainable Management of Fall Armyworm”* at KSNUAHS, Shivamogga, Karnataka, (India) We are committed to fostering collaborative research and knowledge exchange that empowers farming communities and strengthens agricultural resilience. I hope this conference serves as a vibrant platform for sharing innovations, building partnerships and shaping the future of sustainable pest management.
