## **About The Symposium**

The Entomological Society of India (ESI), Delhi invites researchers, academicians, students, and professionals to participate in the National Symposium on "Frontiers in Entomology- 2025". This symposium aims to address the emerging insect pest problems in agriculture and explore the potential of novel tools in understanding insect biology, ecology, and next generation pest management solutions for their management. In recent decades, India has witnessed an unprecedented transformation in its agricultural landscape, stimulated by advancements in technology, changing climatic conditions, and the integration of global trade practices. However, these changes have also given rise to a new wave of challenges, with emerging insect pest problems standing out as a critical concern. The impact of these pests on crop productivity and food security has intensified, with repercussions that extend beyond individual farms to affect the nation's agricultural sustainability. Rapid shifts in climate, evolving pest behaviours, and changing patterns in cropping systems have created an environment where traditional pest management strategies are becoming less effective. As a result, there is a pressing need to explore next-generation solutions tailored to these new pests' challenges.

This symposium brings together leading experts, researchers, policymakers, and industry leaders to share insights, innovations, and strategies.

Therefore join us, as we promote cooperation, exchange state-of-the-art research, and develop a vision for a sustainable future using cutting edge technologies. Your involvement will weave together the knowledge strands creating a rich tapestry of concepts and solutions.

## **ESI Awards Ceremony**

### **About the society & Awards**

The Entomological Society of India (ESI) was founded in 1938, it is one of the largest professional societies in India serving entomologists and researchers in related disciplines. The society is publishing Indian Journal of Entomology since 1938; Indian Entomologist since 2020 and Hexapoda from 2024. The society has published a number of books, technical bulletins, reports, Conference and Symposium proceedings ever since its inception to spread the knowledge of Entomology.

**The Entomological Society of India (ESI) has instituted the following awards:**

### **Nominated Awards**

- ESI Lifetime Achievement Award
- ESI Honorary Fellows

### **Competitive Awards**

- ESI Young Entomologist Award
- ESI Senior Entomologist Award
- ESI Best Ph.D. Thesis Award
- ESI Best Teacher Award
- ESI Industry Award

**The awardees have to make their own arrangements for logistics**
